

CivilPros is a full-service Civil Engineering consulting firm located in downtown Riverside, CA. Our multi-disciplinary team of professionals is hand-selected to meet the needs of our clients, including Registered Engineers with decades of experience in Municipal Public Works engineering. Our service offerings include general Civil Engineering, Land Development, Hydraulics and Hydrology, Traffic Engineering, and Staff Augmentation, as well as complementary support services.

What Makes CivilPros Unique?

CivilPros' Area Manager, Bob Morin, spent 30 years as a public employee, working for the cities of Corona, Moreno Valley, and Oceanside. His knowledge of how city government and Public Works departments operate brings an intricate knowledge of process and procedure, allowing him to offer our clients distinctive solutions that set our firm apart from the rest.

Saving clients time and money is a core value of CivilPros. We understand the unique needs of Public Agencies and it is our mission to exceed your expectations — *efficiently, effectively, and on-time.*

OUR LEADERSHIP TEAM

BASEM MUALLEM, PE

Vice President, Inland Empire Area Manager

Mr. Muallem joined CivilPros as Vice President and Inland Empire Area Manager, as well as statewide transportation lead. He helps manage the Redlands Passenger Rail Program, as well as growing the CivilPros company. Before joining the firm, he worked at Caltrans for 32 years, holding various positions including Deputy District Director for maintenance, program management, and right of way. He also served as Division Chief for Maintenance and Right of Way in Sacramento as well as District 8 Director.

BOB MORIN, PE, TE

Assistant Vice President

Mr. Morin is an Assistant Vice President for CivilPros in the Riverside Office. He is experienced in civil engineering, construction management and traffic engineering for municipal public works projects, major freeway projects, and grade separation projects. Bob's technical experience and vast contract administration knowledge has enabled him to successfully manage and deliver some of the largest construction projects in the area — on time, on budget, and to the client's complete satisfaction.

LUIS FLORES, PE

Senior Civil Engineer/Project Manager

Mr. Flores has over 25 years of increasing technical and managerial responsibility as a Lead Civil Engineer, Project Engineer, Deputy Resident Engineer, and Project Manager for the design and construction of civil infrastructure for major private and governmental clients. Luis has experience designing and managing the construction of site improvements, utilities, grading, drainage, parking, pedestrian and bicycle facilities, storm drains, curb and gutter, sewer and water lines, and retaining walls.

DAVID BERRYMAN, PE

Senior Civil Engineer/Project Manager

Mr. Berryman has 25 years of Construction Management, Roadway Design, Hydrology, Hydraulics, and Project Management experience. He has performed Lead Engineer responsibilities on numerous transportation and drainage projects for both the public and private sectors. He is well-versed technically with experience in preparing hydraulics/hydrology reports, signing and striping plans, traffic control, erosion control, and other integral components of major engineering projects.

MOHAMMAD ELHOICHEIMI, PE, QSD

Civil Engineer

Mr. ElHocheimi is experienced in projects with different agencies and districts throughout California and federal government through multiple projects with NAVFAC. He has five years of experience with various utilities, highways, rail, water, wastewater treatment, and site development projects. Mr. ElHocheimi has a keen interest in alternative delivery methods, construction risk analysis, schedule analysis, construction management, and Lean Design and Construction.

MARK ESPOSITO, PE, TE, PTOE

Senior Project Manager

Mr. Esposito's role as a Senior Project Manager is to provide project management and design expertise for various traffic-related projects. He has 28 years of experience with the preparation of project plans, specifications, and estimates (PS&Es). Mr. Esposito's specific areas of expertise are signal design and signal operations, ITS design, lighting design, signing, striping, and traffic control design.
